## Summary

Motivated entry-level software developer with a recent associate degree in Computer Programming and hands-on experience building web applications using C#, PHP, JavaScript, and jQuery. Skilled in both frontend and backend fundamentals, currently expanding backend knowledge through personal projects. Brings 4+ years of experience in healthcare and retail with a strong work ethic, attention to detail, and commitment to continuous learning. Eager to join a structured training program to grow into a backend or full-stack development role.

## Technical Skills

Languages: C#, JavaScript, PHP, HTML, CSS, jQuery
Databases: SQLite, MySQL
Tools: Visual Studio Code, Git, GitHub, XAMPP
Frameworks/Libraries: Bootstrap , jQuery
Other: REST API basics, version control, responsive design

## Projects

RSVP Event Management System
- Built using C#, HTML, CSS, and SQLite. Restructured the RSVP system from a PHP-based form into a backend-driven C# project. Designed a mobile-optimized frontend with guest submission form and admin view. Current focus: developing backend logic for form processing and data storage.

Gamified To-Do List Web App
- Built with a group using JavaScript, jQuery, HTML, and CSS. Created a browser-based task manager with dynamic task handling. Designed UI for adding, completing, and organizing tasks.

## Education

San Antonio College
Associate Degree of Applied Science in Computer Programming
Graduated June 2025
